PROFESSIONAL SUMMARY

UX designer with a background in psychology, hospitality, and data analysis — a combination that produces research-grounded, empathy-driven design. Experienced in the full design process from discovery through delivery, with hands-on client work, a formal UX diploma, and a completed high-fidelity prototype built on real user research. Brings real-world perspective on user behavior and business goals from years of working directly with customers in high-pressure service environments.

PROJECTS

Flight Booking Website Redesign • UX Capstone Project •

Feb 2026 – Mar 2026

Figma

- Identified key pain points in the flight booking experience through in-depth user interviews and multiple rounds of usability testing
- Synthesized research findings into actionable design decisions, informing layout, flow, and interaction patterns throughout the prototype
- Designed a high-fidelity, fully interactive prototype in Figma covering the end-to-end booking flow — from search through confirmation
- Iterated on designs based on usability test feedback, demonstrating ability to separate personal preference from evidence-based design
- Documented the full design process including research findings, personas, journey maps, wireframes, and annotated prototypes

Auto Shop Website Redesign • Freelance Client Project

June 2025

- Conducted a UX audit of an existing website for a family-owned auto shop with over 40 years in business, identifying usability issues, outdated visual design, and missed conversion opportunities
- Redesigned the site with a focus on three objectives: modernized aesthetic, improved usability, and increased service booking conversions
- Managed client privacy considerations throughout — used placeholder imagery for inventory and omitted personally identifiable content from the About section at the client's request
- Delivered a fully rebuilt, mobile-responsive site that preserved the business's established identity while significantly improving the customer-facing experience

EXPERIENCE

Freelance UX Designer & Web Designer • Self-Employed

Remote | June 2025 – Present

- Managed the full client workflow independently: cold outreach, discovery call, intake survey, design, revision rounds, and post-launch support
- Applied UX principles to ensure every site is designed around what the end user needs to do, not just aesthetics
- Developed repeatable design and delivery processes to maintain quality and consistency across projects

Front of House Team Lead • Glenmere Mansion

Chester, NY | May 2023 – Present

- Developed deep intuition for user needs by delivering high-touch service in a luxury environment — directly applicable to designing for real human behavior under real conditions
- Identified friction points in guest experience and coordinated solutions in real time, mirroring the problem-solving core of UX work
- Trained and mentored staff on service standards, requiring the ability to communicate process and rationale clearly — a skill central to presenting design decisions

Office Coordinator & Guest Services Associate • Binghamton University

Vestal, NY | Aug 2024 – May 2025

- Observed and responded to a high volume of diverse user needs daily, building practical empathy for how different people interact with systems and environments
- Managed competing administrative tasks simultaneously, developing strong organizational habits that translate to managing design projects and documentation

Payroll Data Analyst (Intern) • ShopRite Corporate Office

Florida, NY | Sept 2021 – Aug 2022

- Applied analytical thinking and attention to detail to high-stakes data — skills that transfer directly to UX research synthesis and usability analysis
- Collaborated cross-functionally with HR and operations teams, navigating stakeholder communication across departments

EDUCATION

Diploma in UX Design • UX Design Institute

Glasgow, Scotland (Remote) | Apr 2026

- Formal training across the full UX process: user research, personas, journey mapping, wireframing, prototyping, and usability testing
- Independently managed all project phases and documentation with no in-person supervision

B.A. in Psychology, Minor in Health & Wellness Studies •

Vestal, NY | May 2025

Binghamton University

- Strong grounding in human behavior, cognitive processes, and research methodology — foundational to evidence-based UX practice
- Vice President, Binghamton Women in Lifting — led organizational planning, team coordination, and event execution

SKILLS

UX & Design:	User research • Usability testing • Wireframing • Prototyping • Journey mapping • UX auditing • Information architecture • Responsive design
Tools:	Figma • Miro • Microsoft Office • Squarespace / Webflow
Soft Skills:	Empathy • Systems thinking • Stakeholder communication • Attention to detail • Self-direction
